Journal of Biochemical and Biophysical Methods, 14 (1987) 359–362
Elsevier

Contents of Volume 14

No. 1

E.R. Tovey, S.A. Ford and B.A. Baldo (Australia)
Protein blotting on nitrocellulose: some important aspects of the resolution and detection of antigens in complex extracts (BBM 00577) 1

F.J.G. Muriana, M.C. Sánchez, J.D. Rodulfo, M.C. Alvarez-Ossorio and A.M. Relimpio (Spain)
Optimization of the cell envelope disruption of extremely halophilic bacteria (BBM 00579) 19

P. Wenger, M. de Zuanni, P. Javet, C. Gelfi and P.G. Righetti (Italy)
Amphoteric, isoelectric Immobiline membranes for preparative isoelectric focusing (BBM 00581) 29

K. Lindenhayn, R. Haupt, H.-H. Heilmann and H. Wolf (G.D.R.)
Semiquantitative determination of low molecular weight proteinase inhibitors in the presence of high molecular weight inhibitors by a modified radial diffusion assay (BBM 00580) 45

T. Marshall, S.M. Paviour and K.M. Williams (U.K.)
A simplified method for the electrophoretic analysis of hair proteins (BBM 00582) 53

No. 2

J.S. Baumstark (U.S.A.)
A simple one-column procedure for the separation of swine and human serum transferrins (BBM 00586) 59

P. Taylor, L.J. Perry, U. Desselberger and H.S. Marsden (U.K.)
Computer assisted size measurement on a digitising tablet of nucleic acid and protein molecules from gels (BBM 00587) 71

M. Mäkelä, T. Korpela and S. Laakso (Finland)
Colorimetric determination of β-cyclodextrin: two assay modifications based on molecular complexation of phenolphtalein (BBM 00583) 85

U. Carpentieri, J. Myers, C.W. Daeschner III and M.E. Haggard (U.S.A.)
Observations on the use of a cation exchange resin for the preparation of metal-depleted media for lymphocyte culture (BBM 00585) 93

T. Cserháti and M. Szógyi (Hungary)
Charge transfer chromatography used to study the interaction between synthetic phospholipids and nonylphenyl-nonylglycolate (BBM 00588) 101

J. Schreiber and W. Lohmann (U.S.A. and F.R.G.)
A low-cost microcomputer and interface for an electron spin resonance spectrometer (*Short Note*) (BBM 00584) 109

0165-022X/87/$03.50 © 1987 Elsevier Science Publishers B.V. (Biomedical Division)

Book Review 115

Announcement 116

Contents of Journal of Micronutrient Analysis, Vol. 2, No. 384 117

No. 3

J. Estelrich and R. Pouplana (Spain)
Measurement of a glycoprotein with blood group activity A by light scattering (BBM 00593) 119

R. Uhl, H. Desel, N. Ryba and R. Wagner (F.R.G.)
A simple and rapid procedure for the isolation of intact bovine rod outer segments (ROS) (BBM 00589) 127

C. Gelfi, P.G. Righetti, E. Rovida and M. Samaja (Italy)
Purification of human hemoglobin valence intermediates by preparative immobilized pH gradients (BBM 00591) 139

C.C. Curtain, P.G. Holt and F.D. Looney (Australia)
ESR spectroscopy in the study of antigen processing – uptake of spin-labelled antigens by macrophages (BBM 00592) 149

S.M. Ross and C.P. Reynolds (U.S.A.)
Automation of protein assays with a microcomputer interfaced to a spectrophotometer (BBM 00594) 161

W.H. Schuette and C.P. Mudd (U.S.A.)
An iterative method for the deconvolution of microcalorimeter thermograms (BBM 00595) 167

O. Francino, J. Piñol and O. Cabré (Spain)
Precipitation of DNA by cetyltrimethylammonium bromide to avoid coprecipitation of salts. Application of the method of recovery of *Drosophila* DNA following adsorption to hydroxyapatite (*Short Note*) (BBM 00590) 177

Announcements 181

No. 4

B.E.R. Sandström and K.J. Johanson (Sweden)
A direct assay for detection of chemically induced changes in the rejoining kinetics of radiation induced DNA strand breaks (BBM 00596) 183

M.P. Jamaluddin and L.K. Krishnan (India)
A spectrophotometric method for following initial rate kinetics of blood platelet aggregation (BBM 00597) 191

H. Hayashi, N. Takahashi, M. Fujii, C. Yoshikumi, Y. Kawai and T. Iwaguchi (Japan)
Determination of an immunosuppressive substance in serum by latex particle electrophoresis (BBM 00599) 201

V.J. Cannistraro, P. Hwang and D.E. Kennell (U.S.A.)
Isolating and sequencing the infrequent 3′-ends of a specific mRNA (BBM 00600) 211

361

W. Bertling, K. Hunger-Bertling and M.J. Cline (U.S.A.)
Intranuclear uptake and persistence of biologically active DNA after electroporation of mammalian cells (BBM 00601) 223

J.W. Metselaar, H.G. Goovaerts and J. Crezee (The Netherlands)
Generation of a fast and homogeneous temperature step (BBM 00602) 233

Book Review 243

No. 5

U. Göbel, R. Maas and A. Clad (F.R.G.)
Quantitative electroelution of oligonucleotides and large DNA fragments from gels and purification by electrodialysis (BBM 00606) 245

H.K. Samanta and D. Engel (U.S.A.)
Deionization of formamide with Biorad AG501-X(D) (BBM 00603) 261

C. Mazière, J.C. Mazière, L. Mora and J. Polonovski (France)
Rapid analysis of cellular lipids without extraction (BBM 00605) 267

C.L. Shriner and D.L. Brautigan (U.S.A.)
Metal chelate affinity chromatography of Zn^{2+}-inhibited protein Tyr(P) phosphatases (BBM 00604) 273

D.M. Yarmush, G. Morel and M.L. Yarmush (U.S.A.)
A new technique for mapping epitope specificities of monoclonal antibodies using quasi-elastic light scattering spectroscopy (BBM 00607) 279

L. Miribel and P. Arnaud (U.S.A.)
Fractionation of plasma proteins using dye–ligand chromatography: elution profiles on immobilized Green TSK-AF (BBM 00608) 291

No. 6

K.P.M. Heirweg, J.A.T.P. Meuwissen and R. Lontie (Belgium)
Selective absorption and scattering of light by solutions of macromolecules and by particulate suspensions (*Minireview*) (BBM 00614) 303

L. Holmquist (Sweden)
Purification of human plasma lecithin:cholesterol acyltransferase by covalent chromatography (BBM 00609) 323

O. Rimet, M. Chauvet, M. Bourdeaux and C. Briand (France)
A novel fluorometric assay for quantitative analysis of dihydrofolate reductase activity in biological samples (BBM 00612) 335

K. Vedralová, J. Borovanský and J. Duchoň (Czechoslovakia)
Protein determination in materials containing melanin (BBM 00613) 343

J.A. Martinez (Spain)
Validation of a fast, simple and reliable method to assess protein synthesis in individual tissues by intraperitoneal injection of a flooding dose of [^{3}H]phenylalanine (*Short Note*) (BBM 00611) 349

I. Šafařik (Czechoslovakia)
A modified procedure for the preparation of insoluble chromogenic substrates for the determination of proteolytic activity (*Short Note*) (BBM 00610) 355
